# Company profile

Suzhou Cotaus Biomedical Technology Co., Ltd was established in 2010. Cotaus focuses on the automated consumables applied in the S&T service industry, based on proprietary technology, Cotaus can provide broad-line of sales, R&D, manufacturing, further customization services.

Within an independent R&D team, Cotaus holds a high precision mold manufacturing factory in Suzhou, imports advanced equipment and manufacturing machines, carries out safety production in accordance with ISO 13485 system. We provide automated consumables with high and stable quality to our customers. Our products are widely used in life science, pharmaceutical industry, environmental science, food safety, clinical medicine and other fields. Our customers cover more than 70% of IVD listed companies and more than 80% of Independent Clinical Labs in China.

In 2022, Cotaus constructed a new smart factory in Taicang to promote the realization of diverse product, global business and high-end brand. The corporate vision of "Improve health, create a good life" is coming true.

## Pipette Tips Products

Automated pipette tips are compatible with a variety of automated pipetting workstations and automated sampling systems. They are used to distribute and transfer liquids to help complete high-throughput operation of biological samples. Universal pipette tips are made with high precision molds. With excellent processing technology and good pipetting performance, they are adapted to major brands such as DragonLab, Gilson, Eppendorf, Thermofisher, etc.

- ✔ Made of high quality PP(polypropylene);
- ✔ DNase/RNase free, Pyrogen free;
- ✔ Low CV Accuracy,strong hydrophobicity, no liquid adhesion;
- ✔ High quality filter,tight sealing, cross infection prevention;
- ✔ Excellent toughness,not easy to deform, good verticality and air tightness.

## Nucleic Acid Products

Used for nucleic acid extraction and amplification, nucleic Acid products meet the needs of automatic workstations and laboratories. Deep well plate are available in various specifications. PCR series apply to PCR and qPCR experiments.

- ✔ DNase/RNase free, pyrogen free;
- ✔ High transparency, clear digital marker on plate, easy for sample tracking;
- ✔ Good stability, no reaction with the reagents;
- ✔ Passed strict air tightness testing, no liquid leakage.

## Protein Products

Protein Analysis products meet the needs of automatic workstations and labs and can be used in different protein detection, such as Chemiluminescent, Elisa, etc. The surface of chemiluminescent products is clear, while the surface of Elisa plate is specially treated. All products help achieve ideal experimental result.

- ✔ DNase/RNase free, pyrogen free;
- ✔ High flatness and transparency;
- ✔ Batch-to-batch consistency, low intra-batch CV value difference;
- ✔ Standard format design, clear digital marker, individually wrapped, easy for sample tracking;
- ✔ Chemiluminescence products customization services.

## Cell Products

Cell Culture products meet the various needs of cell culture. Irradiated and non-cytotoxic, cell containers are available in different specifications, colors and differently treated surfaces.

- ✔ Made of high quality polystyrene (PS)/polyethylene(PE);
- ✔ High transparency for easy observation;
- ✔ TC-Treated for excellent cell attachment;
- ✔ Irradiated, DNase/RNase free, pyrogen free, endotoxin free.

## Chromatography Products

Chromatography products are compatible with mainstream chromatographic instruments such as Waters, Agilent, Shimadzu, etc. Made of high purity medical grade raw materials, they help shorten the filtration time before sample adding, reduce the sample loss and avoid precipitation in use.

- ✔ Made of high quality polypropylene (PP), DNase/RNase free, Pyrogen free;
- ✔ Reusable outer tube, inner tube based on cap;
- ✔ White silicone rubber / red PTFE preslit septum;
- ✔ Available in NYLON and PTFE filter membrane.

## Storage Products

Sample storage products meet the short-term and long-term storage needs of different reagents. Made of imported plastic, storage products have good chemical compatibility. Cryogenic vials are suitable for automation scenarios. Centrifuge tubes, reagent bottles and reagent reservoirs are available in a variety of specifications.

- ✔ DNase/RNase free, pyrogen free;
- ✔ Sterile - SAL  $10^{-6}$ ;
- ✔ Clear white measuring scale and writing area;
- ✔ Multiple packaging options;
- ✔ Unique label for ease of tracking and identification.

## Sealed Products

Sealing Products are designed for commonly used deep well plates, Elisa plates and PCR plates. They guarantee the tight sealing and don't react with samples. It's easy to use and get the reliable experimental results.

- ✔ DNase/RNase free, pyrogen free;
- ✔ Sterile - SAL  $10^{-6}$ , temperature range:  $-70^{\circ}\text{C}$  ~  $100^{\circ}\text{C}$ ;
- ✔ Non-autofluorescence, no reaction with samples, no influence on optical analysis;
- ✔ Multiple packaging options.
